

ARYAN RAJPUT

Frontend Web Developer | React | Responsive Design | JavaScript | Continuous Learner

aryan692000@gmail.com • linkedin.com/in/aryan-rajput-0595b0214/ • Rishikesh, Uttarakhand, IN

Summary

I am a Frontend Developer with expertise in React, HTML, CSS, and JavaScript. I excel at building responsive, user-friendly web applications and possess solid programming skills in Python and C++. I am committed to continuous learning and improvement and eager to leverage my technical skills and experiences to contribute effectively to a dynamic development team

Experience

CODSOFT

Remote

Web Developer

05/2024 - 06/2024

Remote company specializing in web development

- Designed and implemented responsive web applications using HTML, CSS and Javascript
- Solved various bugs and problems

NMOLD PVT. LTD.

Remote

Front End Web Developer

12/2024 - 04/2025

Company Description

- Developed and maintained **responsive, user-friendly websites** using **React.js, HTML, CSS, and JavaScript**, ensuring seamless performance across all device sizes and browsers.
- Implemented **modular and reusable components** using modern frontend frameworks, increasing development efficiency and maintainability.
- Optimized web performance through techniques like **lazy loading, code splitting, and responsive image handling**, reducing average load times by up to 30%.
- Actively contributed to **AI feature planning**, including chatbot workflows, intent handling, and UI/UX flow for intelligent interactions.
- Integrated AI-powered chatbots and AI agents** using OpenAI/Gemini APIs to enhance user interaction, automate support, and improve engagement.
- Utilized version control tools like **Git and GitHub** for collaborative development and project tracking.

The Craftsyc

Remote

Front End Web Developer

04/2025 - Present

- Designed and developed **production-grade, responsive websites** for tourism businesses including **Paradise Uttarakhand** and **Paradise Bliss Tours**, resulting in increased traffic and lead generation.
- Built **interactive and visually appealing UIs** using **React.js, Tailwind CSS, and Next.js**, tailored to reflect brand identity and optimize user engagement.
- Used **real-time data integration and dynamic content rendering** to keep websites up-to-date with latest offers and itineraries.
- Collaborated with business stakeholders to gather requirements and deliver **SEO-friendly, mobile-first web solutions** that aligned with marketing goals.
- Deployed websites using Hostinger and **custom domain configurations**, managing both development and production environments.

Education

Nirmal Ashram Deepmala Public School

Shyampur

High School

09/2019 - 06/2020

Nirmal Ashram Deepmala Public School

Shyampur

09/2021 - 06/2022

College of Engineering Roorkee

09/2022 - Present

Bachelor of Information Technology

Skills

C/C++ • CSS • HTML • Python • JavaScript • Next.js • Python • React • Tailwind • Node.js • Responsive Webdesign • MongoDB • MySQL

Projects

AI Chat bot

AI Chat bot project using modern web technologies

- Implemented Google Gemini API
- Fetched data from Google Gemini API
- Technology used is React.js and Node.js

Weather App

Weather application project showcasing frontend development skills

- Developed a dynamic weather application as a personal project using HTML, Tailwind CSS, and a weather API
- Designed a clean and user-friendly interface with Tailwind CSS, ensuring responsive and visually appealing design across devices
- Integrated a weather API to fetch and display real-time weather data for various locations

HarvestHub

HarvestHub is a MERN-based marketplace that connects local farmers directly with buyers, allowing farmers to list fresh produce with real-time availability.

- Built **HarvestHub**, a MERN-stack marketplace connecting farmers directly with local buyers.
- Implemented **produce listing system** with item details, pricing, and availability status.
- Developed **order & checkout workflow** with delivery instructions and confirmation.
- Integrated **secure user authentication (JWT)** for farmers and buyers.
- Created a **farmer dashboard** to manage product stock, pricing, and availability.
- Designed responsive UI using **React + Tailwind** for seamless mobile usability.
- Managed backend APIs with **Node.js + Express** and stored product data in **MongoDB**.
- Enabled users to **filter/search produce** by type, price, and availability.
- Deployed on **Vercel** following scalable project structure.
